Benefits in detail

This plan provides you with the potential to grow your savings with market linked returns along with adequate life insurance cover and savings benefits to protect the financial goals of your loved ones.

Let us take help of an example to see how the product works:

Ishan, a 35-year-old banker, wants to save in a plan that can potentially provide high returns for a sufficient corpus for his family's long-term financial needs. ICICI Life Signature Assure provides the perfect solution for his needs and ensures family's goals are assured irrespective of his survival during the policy term.

Ishan decides to stay invested for a long-term and enjoys the benefits of compounding and chooses a 25-year policy term. During this term, he will be paying ₹ 1,00,000 for 10 years, i.e. a total of ₹ 10 Lacs. He has opted "1 time" Funding of Premium option

He has opted for 5% Family Income benefit.

On Ishan's survival till date of maturity, provided he has paid all due premiums, he will get a lump sum corpus as the Maturity Benefit (i.e. Fund Value), as given in the table below:

Since the fund value depends on the performance of the fund, we have assumed that 100% of the premiums are paid in Maximiser V.

Premium Payment Term: 10 years

Annual Premium: ₹ 1,00,000

Total Premium Paid: ₹ 10,00,000

Policy Term: 25 years

Assumed investment returns	8% p.a.	4% p.a.
Fund Value at Maturity (in ₹)	34,79,303 (₹ 34.7Lakh)	13,99,598 (₹ 13.9Lakh)

The returns shown above i.e. at 4% p.a. and 8% p.a. are not guaranteed and they are not the upper or lower limits of what Mr. Ishan might get back, as the fund value depends on a number of factors including future investment performance. The above-mentioned returns are for illustrative purposes.

On payment of Maturity Benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished. In the event of the death of the Life Assured prior to or on the Date of Maturity then the Maturity Benefit shall be payable to Claimant.

Fund Value payable on maturity of the policy shall include Loyalty Additions.

Loyalty Additions are allocated as extra units at the end of every fifth policy year starting from the end of the tenth policy year. Each Loyalty Addition will be 2.50% of the average of Fund Values on the last business day of the last eight policy quarters.

Loyalty Additions will be allocated between the funds in the same proportion as the value of total units held in each fund at the time of allocation.

Maturity Protect

Ishan does not make any withdrawals from the policy during the policy term and has been timely paying all his due premiums. On the date of maturity, we shall ensure that Ishan at least gets a return of all premiums paid during the policy term.

This feature shall be known as “Maturity Protect”. Kindly refer Terms & Conditions clause 4 for details on this feature.

Ishan is worried about his family’s future goals in case of his unforeseen demise during the policy term. Let’s see how the product helps secure his family’s dreams and aspirations:

Ishan will have a minimum life cover (Sum Assured) of ₹ 10 Lacs under this policy, during the entire Policy Term.

On Ishan’s death during the Policy Term, provided all due Premiums have been paid and the monies are not in the Discontinued Policy Fund, a lump sum benefit will be payable to the Claimant, which will be the higher of:

a) Sum Assured, including Top-Up Sum Assured, if any

b) Minimum Death Benefit

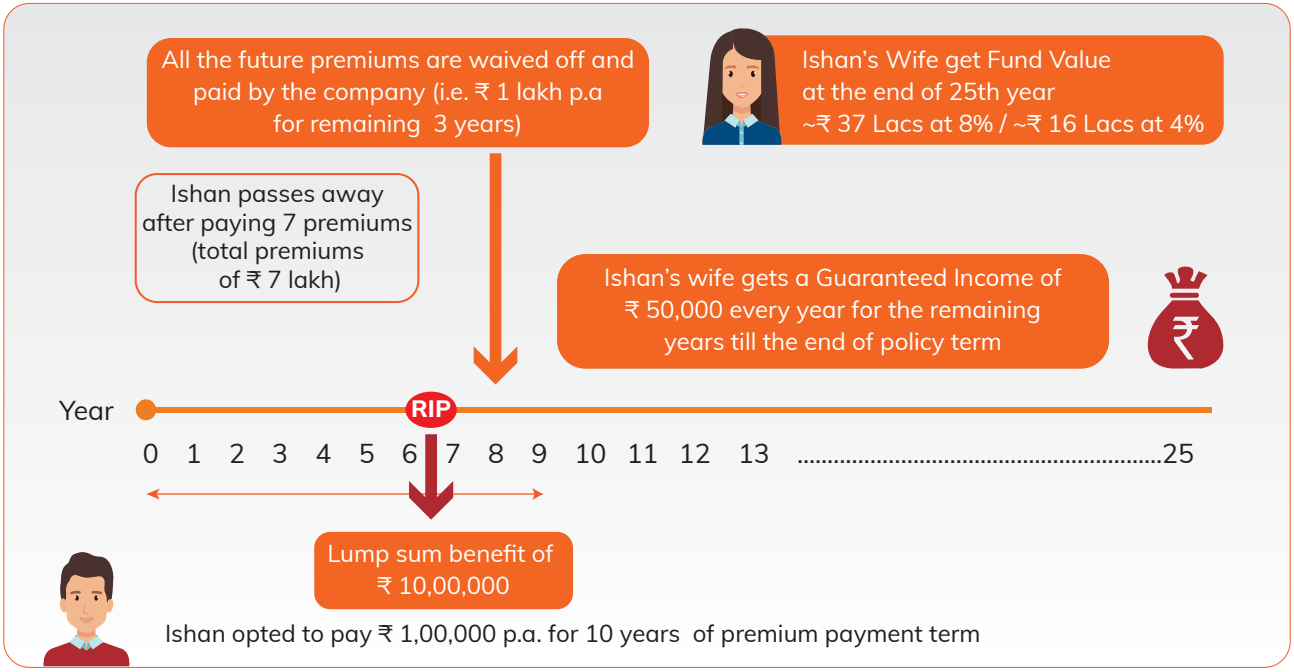
In case of Ishan’s unfortunate demise in the seventh policy year, a lump sum benefit of ₹ 10 Lacs will be paid out to Ishan’s wife (assuming Ishan's wife is the Claimant).

We shall also waive all future premiums payable under the policy after the date of death and will allocate units equivalent to instalment premium net of premium allocation charges into the policy, as and when due. This benefit shall be called “Future Secure Benefit” and shall comprise a part of the “Smart Benefit”.

The policy shall continue till the end of the policy term, with Fund Value being paid out to Ishan’s wife.

Additionally, for her supplementary income needs, Ishan's wife shall also receive an income of ₹ 50,000 every year on policy anniversary till the end of the policy term.
This benefit shall be called "Family Income Benefit" and shall again comprise a part of the "Smart Benefit".

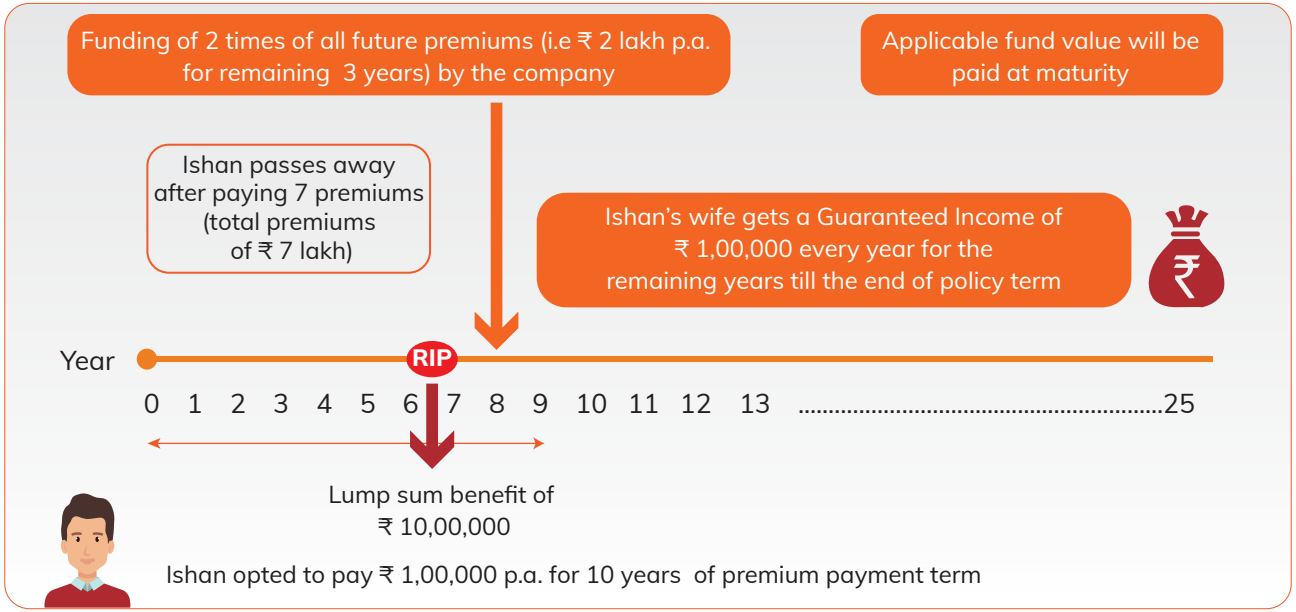
Kindly refer Terms & Conditions clause 5 for details on this benefit.



Taking the benefit a step further, we also give an option of funding 2 or 3 times the instalment premium in the policy by allocating units equivalent to 2 or 3 times the instalment premium as chosen by you, thereby giving extra financial support to the family after the life assured demise.

Lets understand with the following example:

Mr. Ishan a 35-year-old banker decides to stay invested for a long-term and enjoys the benefits of compounding and chooses a 25-year policy term. During this term, he will be paying ₹ 1,00,000 p.a for 10 years, i.e. a total of ₹ 10 Lacs and has opted for "2 times" Funding of Premium option and 10% Family Income benefit.



Lets see how the benefit would look if in the same scenario above Ishan would have opted "3 times" Funding of Premium option and 0% Family Income Benefit.

Choice of portfolio strategies

You can choose from four portfolio strategies to save your money in as per your risk appetite. These are given below:

a) Fixed Portfolio Strategy

This strategy enables you to manage your savings actively. Under this strategy, you may choose to save your monies in any of the fund options in proportions of your choice. You can switch monies amongst these funds using the switch option.

Facilities available under Fixed Portfolio Strategy	
Automatic Transfer Strategy	You have the option to select Automatic Transfer Strategy (ATS). To protect your savings against market uncertainties, you can save all or part of your savings in one or more debt/ equity fund(s) and transfer a fixed amount regularly to one or more equity/ debt fund(s).
Unlimited free switches between funds	Under this facility, you can switch units from one fund to another depending on your financial priorities and savings outlook as many times as you want. This benefit is available to you without any charge. Switches are not available under other portfolio strategies.
Premium Redirection	At policy inception, you specify the funds and the proportion in which the premiums are to be saved in the funds. At the time of payment of subsequent premiums, depending on your market outlook, you may change the split in which the premiums are to be saved in the funds, without any charge. This will not count as a switch. This feature is applicable only if your monies are not in Discontinued Policy Fund.

b) Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

c) Trigger Portfolio Strategy 2

This strategy enables you to take advantage of substantial equity market swings.

Under this strategy, your savings will initially be distributed between two funds Multi Cap Growth Fund, an equity-oriented fund, and Income Fund, a debt-oriented fund in a 75%: 25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a trigger event.

d) Lifecycle based Portfolio Strategy 2

Your financial needs are not static and keep changing with your life stage. It is, therefore, necessary that your policy adapts to your changing needs. This need is fulfilled by the Lifecycle based Portfolio Strategy 2.

At Policy inception, your savings are distributed between two funds, Multi Cap Growth Fund and Income Fund, based on your age. As you move from one age band to another, your funds are re-distributed based on your age.

Change in Portfolio Strategy (CIPS)

You can change your portfolio strategy up to four times in a policy year provided the monies are not in Discontinued Policy Fund. This facility is provided free of cost. Any unutilized Change in Portfolio Strategy cannot be carried forward to the next policy year.

On moving to the Life Cycle based Portfolio Strategy 2 or Trigger Portfolio Strategy 2, the existing funds as well as all future premiums will be allocated between Multi Cap Growth Fund and Income Fund as per the Strategy details mentioned earlier.
On moving to the Target Asset Allocation Strategy or Fixed Portfolio Strategy, you must specify the proportions amongst the choice of funds available in which the existing funds and future premium should be saved.

The nominee/ appointee can exercise the option for change in portfolio strategy post death of the life assured while the Smart Benefits are applicable.

Once selected, Automatic Transfer Strategy (ATS) will be renewed and would be regularly processed for the entire term of the policy or until the Company is notified, through a written communication, to discontinue the same. The Automatic Transfer Strategy will not be applicable if the source Fund Value is less than the amount nominated for transfer.

b) Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocationis maintained.

The re-balancing of units shall be done on the last day of each Policy quarter. If the last day of the quarter is a non-working day, then the next working day's NAV (i.e. the price per unit of the Fund) willbe applicable.

c) Trigger Portfolio Strategy 2

Under this strategy, your savings will initially be distributed between two funds Multi Cap Growth Fund, an equity-oriented fund, and Income Fund, a debt oriented fund in a 75%: 25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a trigger event.

Working of the strategy:

- The trigger event is defined as a 10% upward or downward movement in NAV of Multi Cap Growth

Fund, since the previous rebalancing. For determining the first trigger event, the movement of 10% in NAV of Multi Cap Growth Fund (details on fund options available under the product are available in the "Choice of Funds" above) will be measured vis-à-vis the NAV at the inception of your strategy.

- On the occurrence of the trigger event, any fund value in Multi Cap Growth Fund which is in excess of three times the Income Fund, fund value is considered as gains and is transferred to the liquid fund - Money Market Fund by cancellation of appropriate units from the Multi Cap Growth Fund. This ensures that gains are capitalized, while maintaining the asset allocation between Multi Cap Growth Fund and Income Fund at 75%:25%
- In case there are no gains to be capitalized, funds in Multi Cap Growth Fund, Income Fund and Money Market Fund are redistributed in Multi Cap Growth Fund and Income Fund in 75:25 proportion.

d) Lifecycle based Portfolio Strategy 2

Key features of this strategy

- Age based portfolio management

  At Policy inception, your savings are distributed between two funds, Multi Cap Growth Fund and Income Fund, based on your age. As you move from one age band to another, your funds are re-distributed based on your age. The age wise portfolio distribution is shown in the table.

Asset allocation details at Policy inception and during the Policy term

Age of Life Assured (years)	Multi Cap Growth Fund	Income Fund
Up to 25	80%	20%
26 – 35	75%	25%
36 – 45	65%	35%
46 – 55	55%	45%
56 – 65	45%	55%
66 +	35%	65%

- **Quarterly rebalancing**

  On a quarterly basis, units shall be rebalanced as necessary to achieve the above proportions of the Fund Value in the Multi Cap Growth Fund and Income Fund. The re-balancing of units shall be done on the last day of each Policy quarter. The above proportions shall apply until the last ten quarters of the Policy are remaining.

- **Safety as you approach maturity**

  As your Policy nears its maturity date, you need to ensure that short-term market volatility does not affect your accumulated savings. In order to achieve this, your savings in Multi Cap Growth Fund will be systematically transferred to Income Fund in ten instalments in the last ten quarters of your Policy.
