ICICI Life Signature Pension provides the perfect solution for his needs.

On Aditya’s survival till policy vesting, provided he has paid all due premiums, he will get vesting benefit, as given in the table below:

Now lets assume Mr Aditya also plans retirement for his spouse aged 40 years Female in the same plan . He hence choses Family secure option in Advantage variant. He wants to invest ₹ 2,00,000 yearly for 15 years so that he and his wife can retire at 60 peacefully

| Assumed investment returns | 8% p.a. | 4% p.a. |

# Choice of portfolio strategies

You can choose from four portfolio strategies to save your money in as per your risk appetite. These are given below:

## a) Fixed Portfolio Strategy

This strategy enables you to manage your savings actively. Under this strategy, you may choose to save your monies in any of the fund options in proportions of your choice. You can switch monies amongst these funds using the switch option.

| Facilities available under Fixed Portfolio Strategy | |
|---|---|
| Automatic Transfer Strategy | You have the option to select Automatic Transfer Strategy (ATS). To protect your savings against market uncertainties, you can save all or part of your savings in one or more Pension debt/ equity fund(s) and transfer a fixed amount regularly to one or more Pension equity/ debt fund(s). |
| Unlimited free switches between funds | Under this facility, you can switch units from one fund to another depending on your financial priorities and savings outlook as many times as you want. This benefit is available to you without any charge. Switches are not available under other portfolio strategies. |
| Premium Redirection | At policy inception, you specify the Pension funds and the proportion in which the premiums are to be saved in the Pension funds. At the time of payment of subsequent premiums, depending on your market outlook, you may change the split in which the premiums are to be saved in the funds, without any charge. This will not count as a switch. This feature is applicable only if your monies are not in Pension Discontinued Policy Fund. |

## b) Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

### c) Lifecycle based Portfolio Strategy

Your financial needs are not static and keep changing with your life stage. It is, therefore, necessary that your policy adapts to your changing needs. This need is fulfilled by the Lifecycle based Portfolio Strategy.

At Policy inception, your savings are distributed between two funds, Pension Multi Cap Growth Fund and Pension Income Fund, based on your age. As you move from one age band to another, your funds are re-distributed based on your age.

## Change in Portfolio Strategy (CIPS)

You can change your portfolio strategy up to four times in a policy year provided the monies are not in Discontinued Policy Fund. This facility is provided free of cost. Any unutilized Change in Portfolio Strategy cannot be carried forward to the next policy year.

On moving to the Life Cycle based Portfolio Strategy, the existing funds as well as all future premiums will be allocated between Pension Multi Cap Growth Fund and Pension Income Fund as per the Strategy details mentioned earlier.

On moving to the Target Asset Allocation Strategy or Fixed Portfolio Strategy, you must specify the proportions amongst the choice of funds available in which the existing funds and future premium should be saved.

If Family Secure Option is chosen, the primary life assured has the option to switch amongst the available Portfolio Strategies. Post the death of primary life assured, the secondary life assured has the option to switch to Target Asset Allocation or Fixed Portfolio Strategy. The secondary life assured cannot switch to Lifecycle based Portfolio Strategy.

## Top-up

To boost your fund value, you can pay any surplus money as Top-up premiums, over and above the base premium(s), into the policy.

- The minimum Top-up premium is ₹ 5000.
- Top-up premiums can only be paid provided you have paid all due premiums of your policy and will be subject to underwriting.
- Top-up premiums once paid cannot be withdrawn from the fund for a period of 5 years from the date of payment of the `Top-up' premium, except in case of complete surrender of the policy.
- You may do a maximum of 99 Top-Ups throughout the Policy Term.
- If Family Secure Option is chosen, only the primary life assured can avail this feature.

## Increase in premium payment term

You have an option to increase the premium payment term, provided you have paid all due premiums.

You may exercise this multiple times during the policy term; the revised premium payment term cannot exceed current Policy Term less 5 years.

Such increase will have to be notified to us in advance no later than 2 months before the end of the existing premium payment term and must always be in multiples of one year.

If Family Secure Option is chosen, only the primary life assured can avail this feature.

## Benefits of staying in the policy for the long term

By staying in the policy for the long term, you can expect lower reduction in yield, ensuring better returns.

Reduction in yield is the difference between gross yield and net yield, where gross yield is the investment return generated by your fund. Net yield is calculated after deduction of charges (excluding mortality charges and taxes). The lower the reduction in yield, the better it is for the growth of your fund.

The table below shows the Reduction in Yield (RIY) at 8% investment return (gross yield) at sample points for Advantage variant for a 40-year-old male customer, choosing, premium paying term of 10 years, policy term of 40 years, with 100% of investment in Pension India Growth Fund. For Family secure option the age and gender for secondary life assured is considered as 40 years and female.

| At the end of year | RIY stipulated by IRDAI# | RIY in ICICI Life Signature Pension - (Annual premium: ₹ 1,00,000) | RIY in ICICI Life Signature Pension - Family Secure Option Chosen (Annual premium: ₹ 1,00,000) |

This strategy enables you to manage your savings actively. Under this strategy, you may choose to save your monies in any of the fund options (as detailed in "Choice of Funds" above) in proportions of your choice. You can switch monies amongst these funds using the switch option.

**Automatic Transfer Strategy**

Within the Fixed Portfolio Strategy, you also have the option to select Automatic Transfer Strategy (ATS).

Under this strategy You can choose to automatically transfer a fixed amount of Your investment in Pension Income Fund and Pension Money Market Fund in regular instalments into any one or more of the following funds: Pension Multi Cap Growth Fund, Pension Opportunities Fund, Pension Bluechip Fund, Pension Multi Cap Balanced Fund, Pension India Growth Fund, Pension Balanced Fund, Pension India Consumption Fund BSE 500 Momentum Value 50 Index Pension Fund and BSE 500 Momentum Quality 50 Index Pension Fund.

Similarly, You can choose to invest all or part of your investment in one or more of the following funds: Pension Multi Cap Growth Fund, Pension Opportunities Fund, Pension Bluechip Fund, Pension Multi Cap Balanced Fund, Pension India Growth Fund, Pension Balanced Fund, Pension India Consumption Fund, BSE 500 Momentum Value 50 Index Pension Fund or BSE 500 Momentum Quality 50 Index Pension Fund and transfer a fixed amount in regular instalments into one or more of Pension Income Fund and Pension Money Market Fund.

There would be no additional charges for Automatic Transfer Strategy (ATS). It is not compulsory for you to select the Automatic Transfer Strategy. The following conditions apply to Automatic Transfer Strategy (ATS).

- This automatic transfer will be done in either weekly, fortnightly or monthly equal instalments, as per chosen frequency.
- If the date is not mentioned, the funds will be switched on the first day of the next month, from the receipt of the request and will continue based on instalment frequency chosen. If the transfer date is a non-valuation date then the next working day's NAV will be applicable.
- Automatic Transfer Strategy (ATS) would be executed by redeeming the required number of units from fund chosen at the applicable unit value and allocating new units in the destination fund.

Once selected, Automatic Transfer Strategy (ATS) will be renewed and would be regularly processed for the entire term of the policy or until the Company is notified, through a written communication, to discontinue the same. The Automatic Transfer Strategy will not be applicable if the source Fund Value is less than the amount nominated for transfer.

## b) Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

The re-balancing of units shall be done on the last day of each Policy quarter. If the last day of the quarter is a non-working day, then the next working day's NAV (i.e. the price per unit of the Fund) will be applicable.

## c) LifeCycle-based Portfolio Strategy

The idea behind the LifeCycle based Portfolio Strategy is that younger lives have a greater appetite for risk and this reduces with increasing age. Thus, the asset allocations are structured so as to have greater equity exposure in younger years and greater debt exposure as the Life Assured's ages.

The Company's Pension Multi Cap Growth Fund will be used for equity exposure and the Pension Income Fund for debt exposure. The fund value will be allocated to the Pension Multi Cap Growth and Pension Income Funds as per the Life Assured's age as described in the following schedule

| Age of Life Assured (years) | Pension Multi Cap Growth Fund | Pension Income Fund |
|---|---|---|
| 18 - 25 | 85% | 15% |
| 26 – 35 | 75% | 25% |
| 36 – 45 | 65% | 35% |
| 46 – 55 | 55% | 45% |
| 56 – 65 | 45% | 55% |
| 66 & above | 35% | 65% |

On a quarterly basis, units shall be rebalanced as necessary to achieve the above proportions of the Fund Value in the Pension Multi Cap Growth Fund and Pension Income Fund. The re-balancing of units shall be done on the last day of each Policy quarter. The above proportions shall apply until the last ten quarters of the Policy are remaining.

As your Policy nears its vesting date, you need to ensure that short-term market volatility does not affect your accumulated savings. In order to achieve this, your savings in Multi Cap Growth Fund will be systematically transferred to Income Fund in ten instalments in the last ten quarters of your Policy.
